

SLIDING CONCRETE DOORS

(SA Patent 2008/06587)

More and more engineers countrywide are specifying sliding concrete doors to protect pump stations and other installations from vandalism. The saving in 24-hour security typically pays for the door in four months.

Fig 1 & 2 Bloemhof (NW), Fig 3 to 9 (Limpopo), Fig 10 to 15 (Gauteng), Fig 16 Botshabelo (FS), Fig 17 Kwamashu, Fig 18 Tongaat (KZN), Fig 19 Ferrobank (MP), Fig 20 to 22 Rustenburg (NW).

Sliding concrete doors of various types are manufactured and installed by Concrete Doors and Vaults (Pty) Ltd. Please direct enquiries to Dr Nicholas Papenfus at nicholas@damsforafrica.com, or 011 472 1520/8, or 082 416 8958.

A variety of other concrete products such as vaults, ventilation panels, and lockable lids also offer extreme protection to for example valve chambers, generator rooms, boreholes, transformers, control panels, etc., see www.concretedoorsandvaults.com.
